Contact

We have been manufacturing plastic food packaging for 47 years.

NEW ADDITIONS TO OUR RANGE

This year, we have expanded our range of food packaging and are constantly working on new products to ensure that our products meet current market requirements and the wishes of our customers.

VERSATILE USE

Ice cream, pork lard, soup, or a main course from the lunch menu—this is just a short list of foods that you can easily take anywhere thanks to our heat-sealed food packaging.

QUALITY AND SAFETY

All our food packaging meets hygiene requirements for contact with food. We use materials that are safe for human health, such as polypropylene and polyethylene. As a Czech manufacturer of plastic packaging, we meet the highest standards of the food industry.

INNOVATION AND DESIGN

We monitor market trends and regularly update and improve the design of our products according to customer needs. Our priority is not only functionality, but also the aesthetic value of each package.

OUR CUSTOMERS APPRECIATE OUR PACKAGING

Advantages of our food packaging

MATERIAL DURABILITY AND STRENGTH

CAN BE FROZEN AND HEATED IN A MICROWAVE OVEN OR WATER BATH

SEALING TRAYS

for ready meals

for soups

Suitable for packaging individual portions of food, combinations of side dishes, soups, and creams. They are sealed using heat-sealing foil. Our range includes single-compartment, two-compartment, and three-compartment trays. Food can be heated directly in the tray in a microwave oven or frozen. We supply them in black and transparent versions (individual colors can be arranged for larger orders).

Withstand temperatures from -20°C to +100°C (short-term up to + 120°C)
